- Quality assurance
- Vertical integrated Supply Chain from the field to the customer
- Long-term and productive cooperation
- Our experience – Your success!

ABOUT OUR COMPANY

Seedco Group was founded in the 2014 in the partnership of Letofin Group of companies and Ukrainian private investors. Letofin is the company with experience of commodity trading for more than 22 years. Ukrainian partners have agricultural group of companies with land bank of 25000 ha and a grain elevator with 100000 tn of storage capacity.

In summer 2016 Seedco launched a brand-new grain cleaning facility located in Ichnya, Chernigov Region, Ukraine. The facility is located on the elevator's territory. All incoming and outgoing products are tested and analysed at the certified elevator's laboratory. Due to the fact that Letofin is GMP+ certified, Gafta and Sedex Member, all sales and logistics are operated by Letofin.

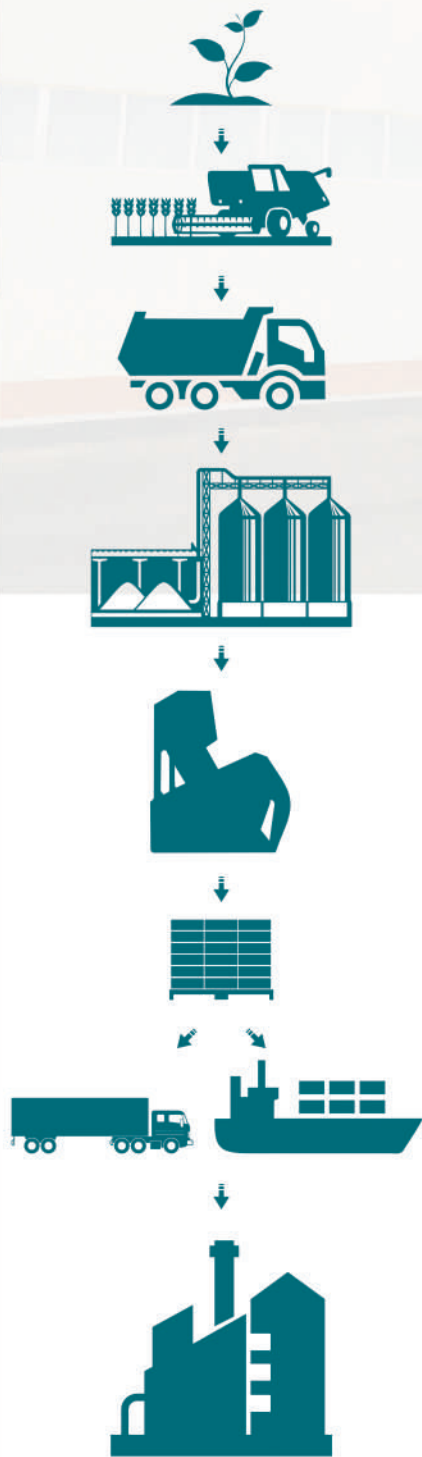

In September 2017 we successfully got ISO:22000 certification at our factory. Today we offer a range of products for human consumption. Working directly with farmers and using latest generation machinery at our factory allows to provide constant quality of raw materials. We know how to meet our customers' needs and save their time. You save with us.

KEY FACTS

- Total cleaning capacity 30 000 mt annually
- Drying facility 100 tn per day
- X ray cleaning capacity 30 tn per day
- 700m² of production facility
- 35 employees
- Investment more than 2 mln euro
- Technological project Petkus
- Machinery Petkus, ANTTI Teollisuus, CIMBRIA SEA Chrome

OUR FOOD PRODUCTS

OIL SEEDS

BROWN LINSEED

- Available quality:**
- Purity min 99.95-99.99%
 - Origin: Ukraine, Russia, Kazakhstan
- Available package:**
- 25 kg
 - 500kg-1tn Big-Bags

**CONFECTIONARY
SUNFLOWER SEEDS**

- Size:**
- 7-8; 9-10; 10+ mm
- Available quality:**
- Purity min 99.95%
 - Origin: Ukraine
- Available package:**
- 25 kg
 - 1tn Big-Bags

SUNFLOWER KERNELS

- Grade:**
- Bakery; Confectionary
- Available quality:**
- Purity min 99.95%
 - Origin: Ukraine
- Available package:**
- 25 kg
 - 500kg-1tn Big-Bags

PULSES

RED LENTILS

- Variety:**
- Crimson
- Grade:**
- Split; Football
- Available quality:**
- Purity min 99.95%
 - Origin: Ukraine
- Available package:**
- 25 kg
 - 500kg-1tn Big-Bags

BROWN LENTILS

- Variety:**
- Crimson
- Available quality:**
- Purity min 99.95%
 - Origin: Ukraine
- Available package:**
- 25 kg
 - 500kg-1tn Big-Bags

GREEN LENTILS

- Variety:**
- Eston, Laird
- Available quality:**
- Purity min 99.95%
 - Origin: Ukraine
- Available package:**
- 25 kg
 - 500kg-1tn Big-Bags

SPICES

MUSTARD SEEDS

Variety:

- Sinapis Alba

Available quality:

- Purity min 99.95%
- Origin: Ukraine

Available package:

- 25 kg
- 500kg-1tn Big-Bags

CORIANDER SEEDS

Available quality:

- Purity min 99.95%
- Origin: Ukraine, Russia, Kazakhstan

Available package:

- 25 kg
- 500kg-1tn Big-Bags

PACKAGING

We offer our high-quality food products for human consumption delivered big-bags and smaller packaging in different sizes.

SMALL PACKAGING

Paper bags

3-layered paper bags

- * May carry contents from 5 to 25 kg
- * Suitable for all types of seeds and grains
- * May be labelled and printed in accordance to your requirements
- * Paper bags may be put directly on pallets

Polypropylene bags of white color

- * May carry contents from 5 to 25 kg
- * Suitable for all types of seeds and grains
- * May be labelled in accordance to your requirements
- * Polypropylene bags may be put directly on pallets

BIG BAGS

4 looped Big-Bags

- * May carry content up to 1 tn
- * Suitable for all types of seeds and grains
- * Special opening from the bottom
- * Reusable up to 5 times
- * Stable carcass
- * May be put on the floor or directly on FIN-pallets

PALLETS

EUR-pallets

- 1200x800x144 mm
- * One-way pallets
 - * EPAL pallets

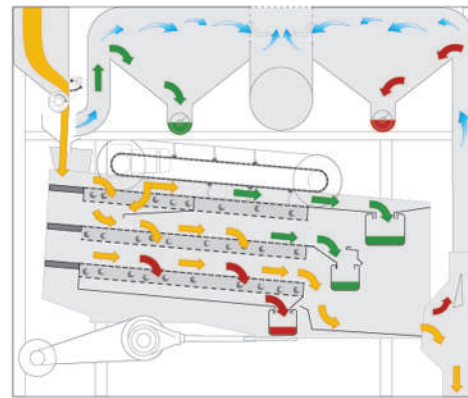

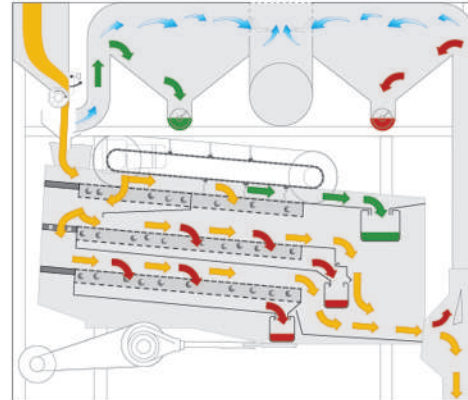

FIN-pallets

- 1200x1000x144 mm
- * One-way pallets

OUR MACHINERY

PETKUS THREE STEP CLEANING

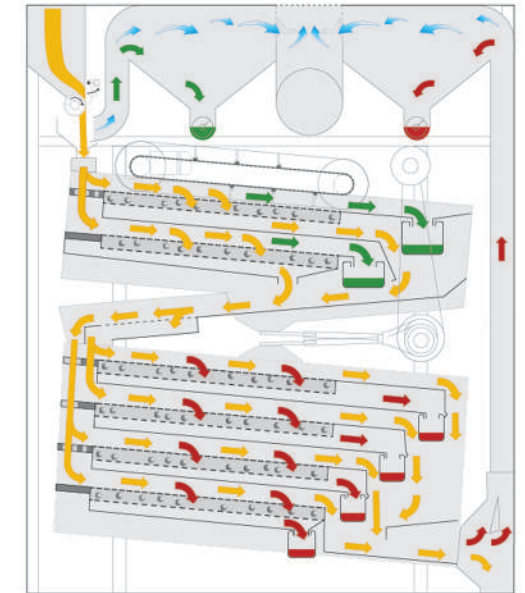

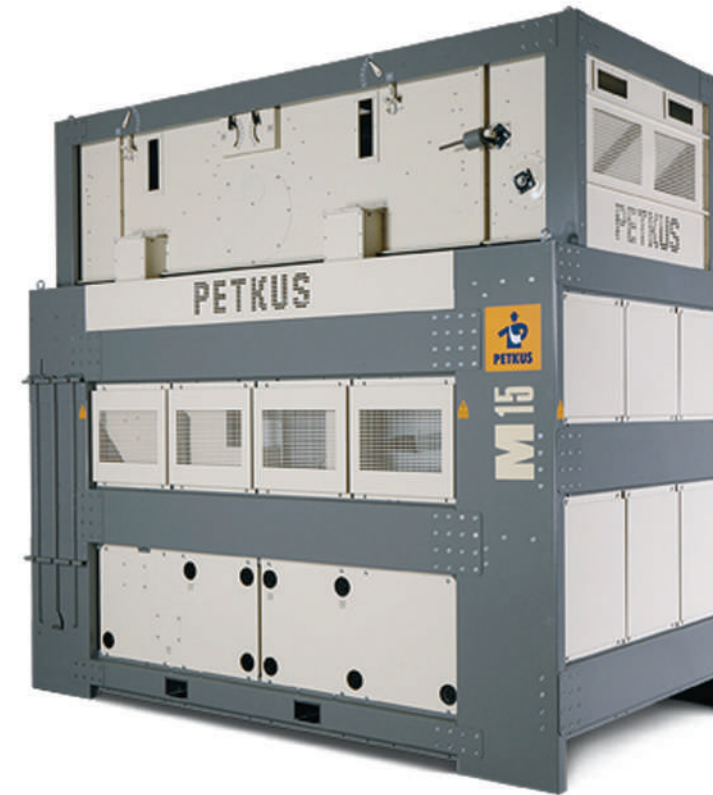

I. PRE-CLEANING - PETKUS A09

The PETKUS A-Cleaner (Agri Cleaner) is a compact, robust and reliable universal cleaner used for pre-, intensive and seed cleaning. The high standard of cleaning is achieved by a combination of the screening system and the air separation. Depending on whether the product to be cleaned is seed or commodities, this cleaner can process between 4 and 50 t/h.

II. CLEANING - PETKUS M12

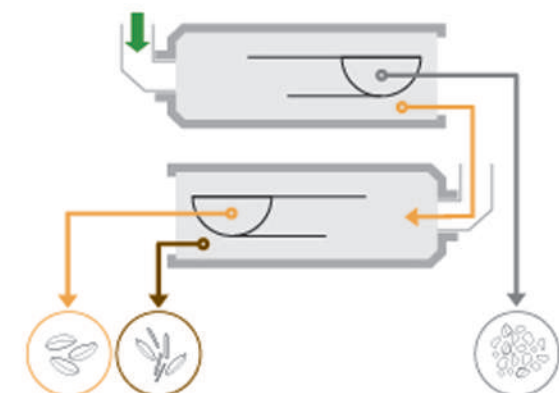

Excellent cleaning results are achieved due to the variable screening diagrams and the patented PETKUS Dual-Channel-Aspiration System.

III. TRYOR (Cylinder ZY)

In the short grain selection broken grains as well as short foreign particles are separated from the product. The long grain separation works correspondingly.

CIMBRIA - SEA CHROME 2 TN+TR - RGB FULL-COLOR SORTER EQUIPPED WITH ADDITIONAL NIR & INGAAS CAMERAS

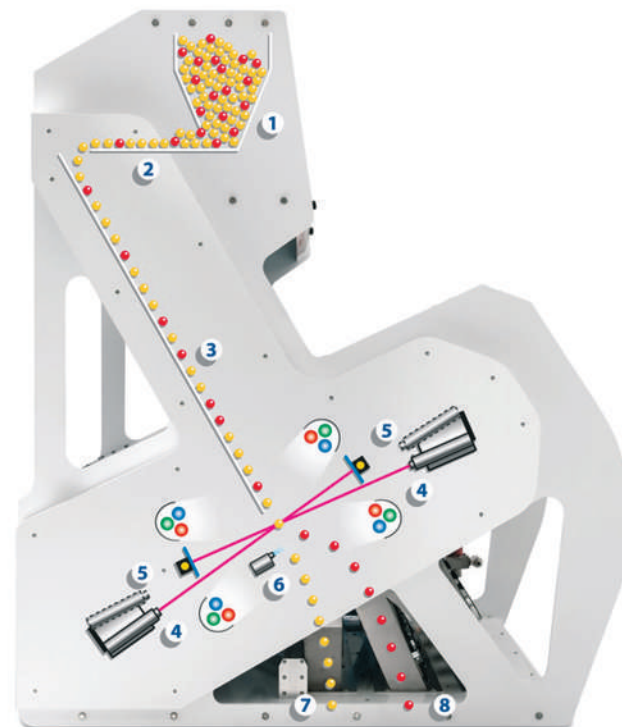

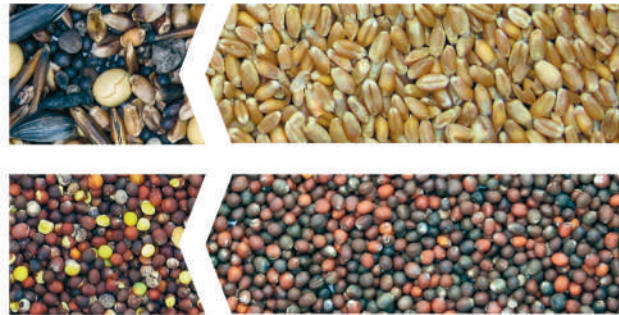

SEA CHROME represents the most innovative and flexible sorting solution based on long terms technical experience and a strong concept.

Optical sorter is equipped with high-resolution full-color RGB trichromatic cameras that, combined with HSI software system, allow a near human eye vision to precisely sort almost any small shade differences.

Software setting can count on the 16 families of defects adjustment, as well as the combination of said 16 groups.

The SEA CHROME shape-sizing function integrated into the system, allows to sort out elements according to their geometric characteristics.

PRINCIPLE OF FUNCTIONING:

- In-feed hopper
- Vibrating feeder
- Chute
- RGB Full-Color camera
- Background
- Ejectors
- Discharging hopper for rejects
- Discharging hopper for sorted product
- 2 NIR additional cameras placed front and 2 InGaAs additional cameras placed back of product flow

ANTTI VACBOOST AGROSEC C320EH - MOBILE DRYER

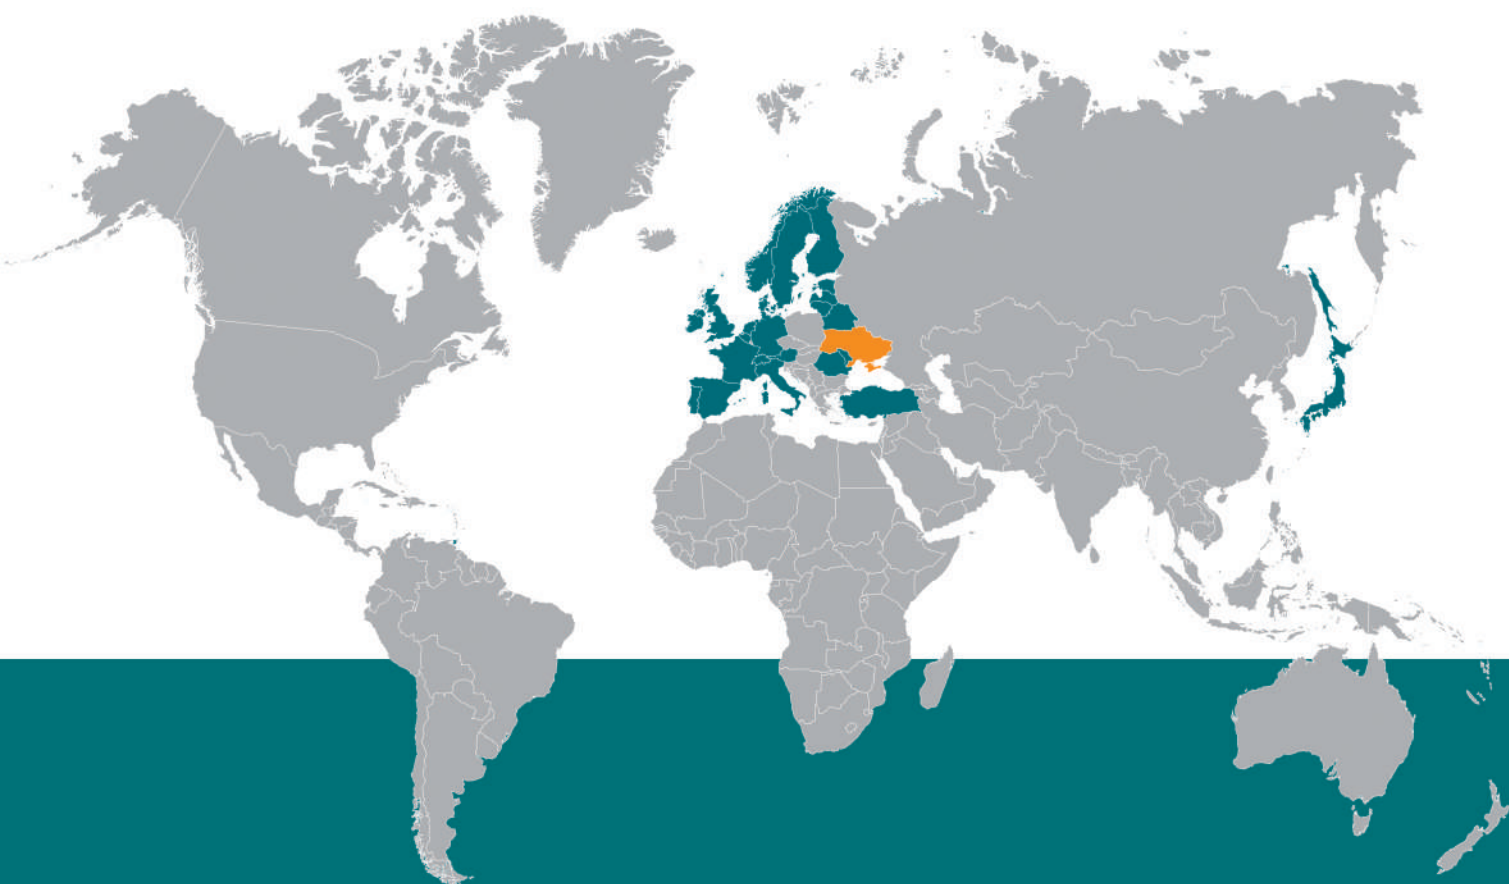

Antti Vacboost dryer is a fast and energy-efficient way to process feed and seed grain as well as other small seeds. It is capable of drying temperatures of up to 100°C. It's vacuum action, which sucks air heated in the heater's heat exchanger through the batch of grain or seeds, results in faster drying speeds and simultaneously serves to reduce the amount of dust.
