- Vertical integrated Supply Chain from the field to the end product
- Long-term and productive cooperation
- Our experience – Your success!

ABOUT OUR COMPANY

Seedco Group was founded in the 2014 in the partnership of Letofin Group of companies and Ukrainian private investors. Letofin is the company with experience of commodity trading for more than 22 years. Ukrainian partners have agricultural group of companies with land bank of 25000 ha and a grain elevator with 100000 tn of storage capacity.

In summer 2016 Seedco launched a brand-new grain cleaning facility located in Ichnya, Chernigov Region, Ukraine. The facility is located on the elevator's territory. All incoming and outgoing products are tested and analysed at the certified elevator's laboratory. Due to the fact that Letofin is GMP+ certified, Gafta and Sedex Member, all sales and logistics are operated by Letofin.

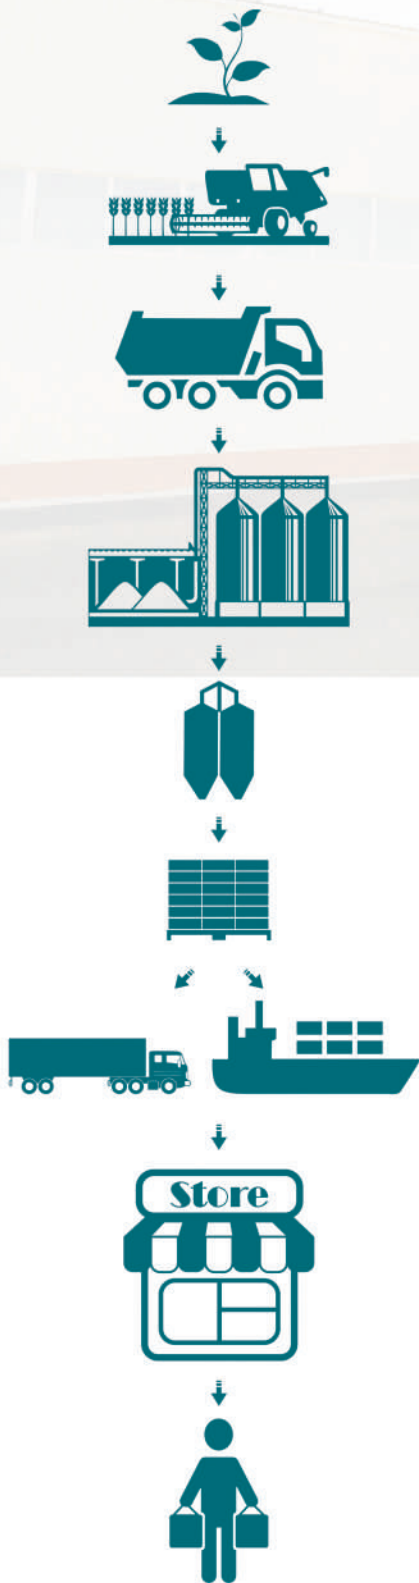

In September 2017 we successfully got ISO:22000 certification at our factory. Today we offer our customers a range of wild bird feeding product seeds and grains. Working directly with farmers and using latest generation machinery at our factory allows to provide constant quality of raw materials. We know how to meet our customer needs and save their time. With us you save.

KEY FACTS

- Total Production 30 000 mt annually
- Daily production capacity 130 mt
- 700m² of production facility
- Drying facility 100 tn per day
- 35 employees
- Investment more than 2 mln euro
- Technological project Petkus
- Machinery Petkus, ANTTI Teollisuus

OUR BIRDFEED PRODUCTS

STRIPED SUNFLOWER SEEDS

Available package:

- 1-25 kg
- Big-Bags
- Bulk

Available quality:

- Total admixture max 2%, max 1%
- Moisture max 8%

GIANT STRIPED SUNSEEDS

Available package:

- 1-25 kg
- Big-Bags
- Bulk

Available quality:

- Total admixture max 1%, max 0,5%
- Moisture max 8%

SUNFLOWER KERNELS

Available package:

- 1-25 kg
- Big-Bags
- Bulk

Available quality:

- Total admixture max 1%
- Moisture max 8%

YELLOW MILLET

Available package:

- 1-40 kg
- Big-Bags
- Bulk

Available quality:

- Total admixture max 1%
- Moisture max 13.5%

RED MILLET

Available package:

- 1-40 kg
- Big-Bags
- Bulk

Available quality:

- Total admixture max 1%
- Moisture max 13.5%

SEED MIXTURES

Available package:

- 1-25 kg
- Big-Bags
- Bulk

Available quality:

- Total admixture max 1%
- Moisture max 14%

EUR-pallets

- 1200x800x144 mm
- * One-way pallets
 - * EPAL pallets

1/2-pallets

- 600x800x144 mm
- * One-way pallets

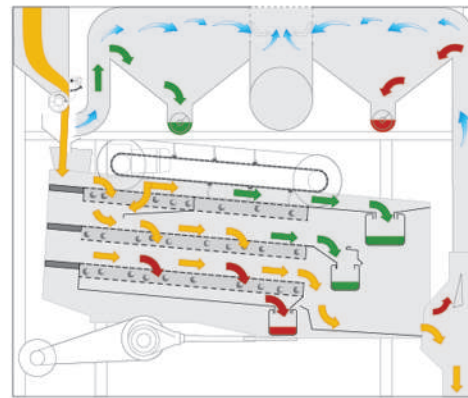

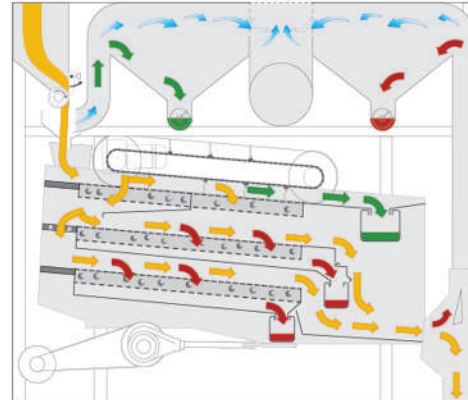

FIN-pallets

- 1200x1000x144 mm
- * One-way pallets

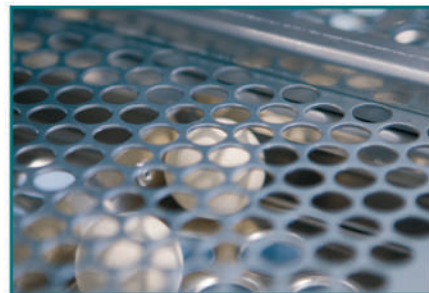

OUR MACHINERY

PETKUS THREE STEP CLEANING

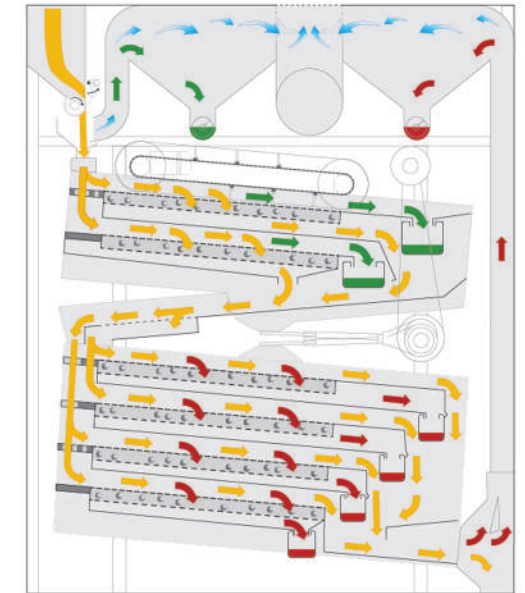

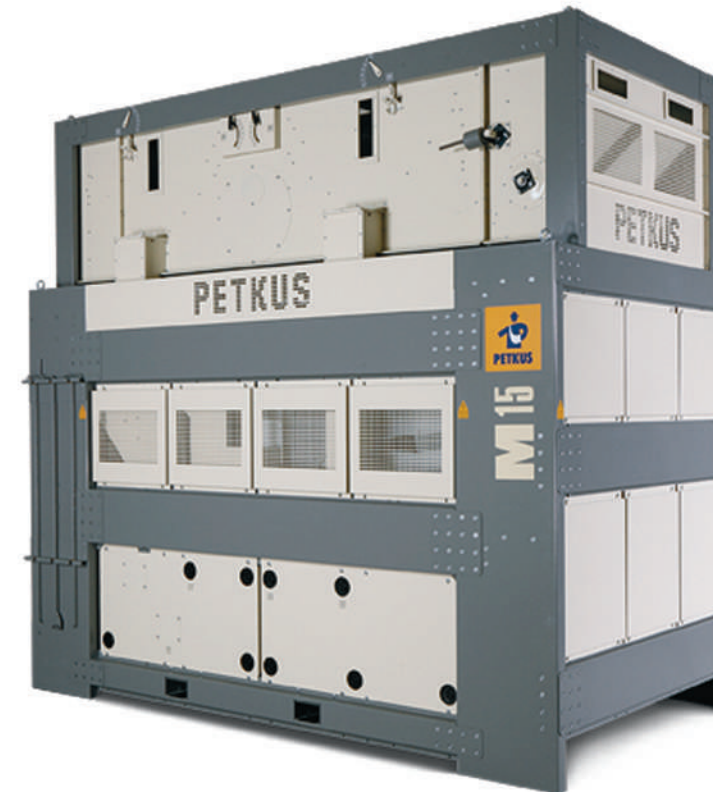

I. PRE-CLEANING - PETKUS A09

The PETKUS A-Cleaner (Agri Cleaner) is a compact, robust and reliable universal cleaner used for pre-, intensive and seed cleaning. The high standard of cleaning is achieved by a combination of the screening system and the air separation. Depending on whether the product to be cleaned is seed or commodities, this cleaner can process between 4 and 50 t/h.

II. CLEANING - PETKUS M12

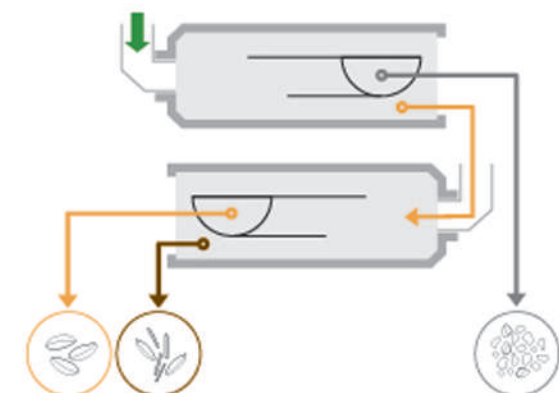

Excellent cleaning results are achieved due to the variable screening diagrams and the patented PETKUS Dual-Channel-Aspiration System.

III. TRYOR (Cylinder ZY)

In the short grain selection broken grains as well as short foreign particles are separated from the product. The long grain separation works correspondingly.

ANTTI VACBOOST AGROSEC C320EH - MOBILE DRYER

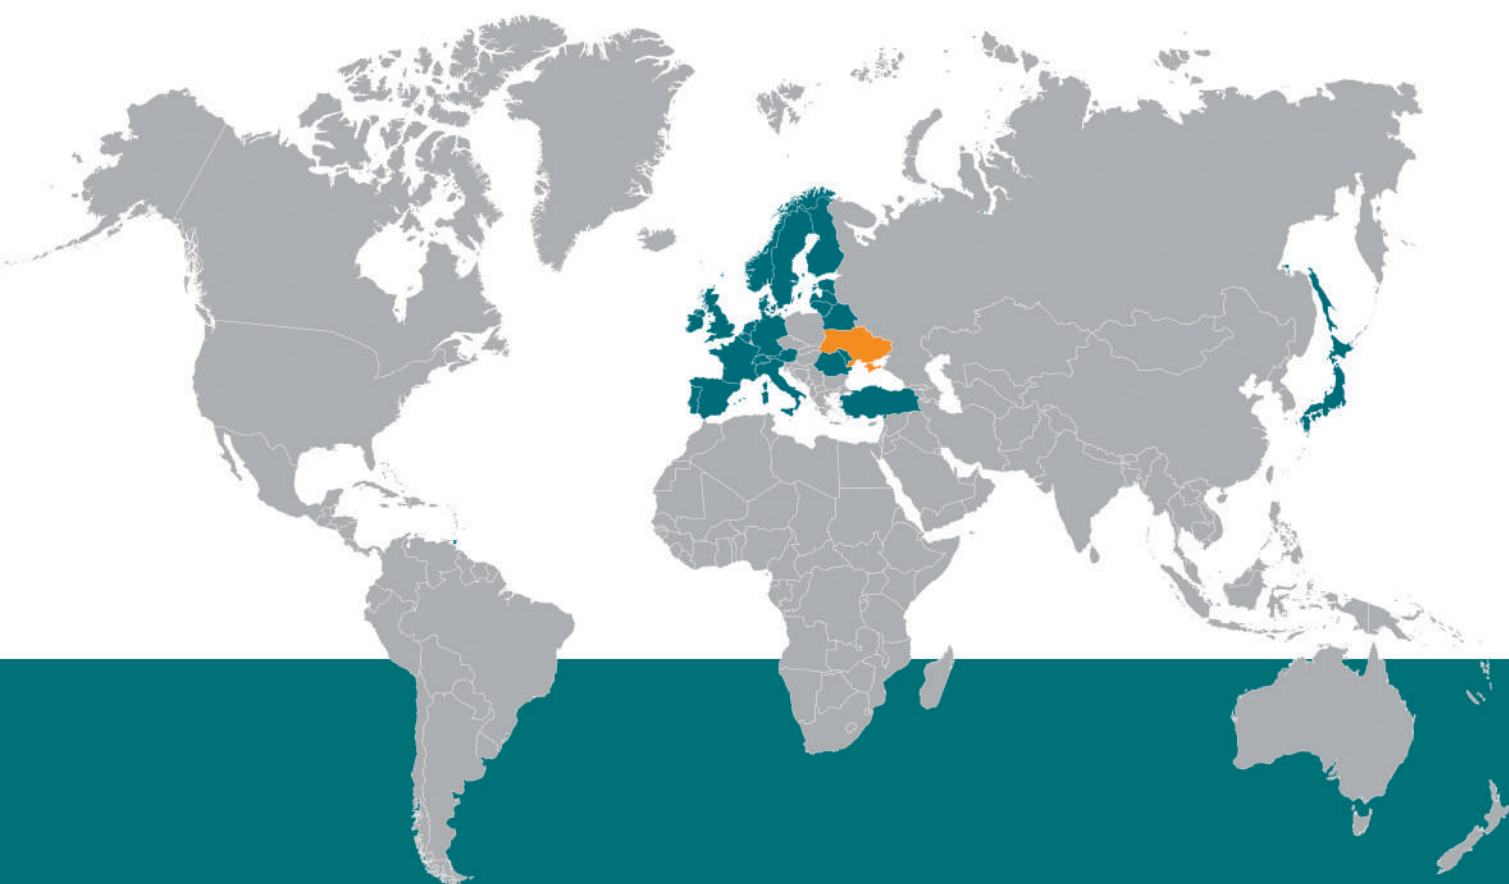

Antti Vacboost dryer is a fast and energy-efficient way to process feed and seed grain as well as other small seeds. It is capable of drying temperatures of up to 100°C. It's vacuum action, which sucks air heated in the heater's heat exchanger through the batch of grain or seeds, results in faster drying speeds and simultaneously serves to reduce the amount of dust.
